

# PAPER ART SHARK

Turn this paper into a shark to  
celebrate SHARK WEEK!

# PAPER ART SHARK

Some things to think about while you complete this activity:

## Challenge:

Create a Paper Art Shark using construction paper, eye stickers, glue stick, and scissors. When the Paper Art Shark is completed (and the glue is dry!), it can be used as a postcard, framed as a work of art, or even be used as an oversized bookmark. If you don't have paper in these colors, you can cut out white paper and color it!

## Questions:

1. Without a template, how can I cut these shapes to represent a shark in the water?
2. How can I arrange the shark's mouth and eyes to express different emotions?
3. How can I use or display art creations?
4. How can I use crayons to add other elements to my work of art?

# STEP 1

Decide if you want a pointy or round shark head, then cut the gray paper into a shark head shape

# STEP 2

Cut the dark blue paper to form waves across one long edge

# STEPS 3 & 4

Cut the black paper into a mouth shape

Cut the white paper into teeth shapes

## STEP 5

Use glue to place the gray shark head onto the light blue sky background, flat edge at the bottom

## STEP 6

Use glue to place the dark blue water across the bottom edge of the shark head, wavy side at the top

## STEP 7

Use glue to place the black mouth shape on the shark head, then glue the white teeth into the mouth

**TIP: before you adhere the mouth and eyes, try arranging them in different ways to find the layout you like best, then glue/sticker!**

## STEP 8

Add eye stickers to complete the shark's face

**TADA! You've got a shark!**
